Subject: Aerial shot of supplier for St. Croix MB cylinder...
[Tri Est AG Group.1.jpg](#)

From Shamika George I got the name of the supplier... Tri Est AG Group located in Palmetto, FL. I went onto their web site and found they have a number of facilities in the South and the MB cyl on St. C. originated from here. This is not a manufacturer however. Using my finely honed photointerpretation skills I was able to discern the bulk shipments of material coming in on the RR spur. My guess is that they get MB in bulk shipments and they off-load it into smaller containers, in this case the 50 lb.cyls. My guess is also that when they accept the cyl back from the VI they will refill the bottle and use it for another customer. If someone is not comfortable having that cyl sent to the FL facility the time is now to express concerns.
